56 Rockland Drive, Jericho NY 11753

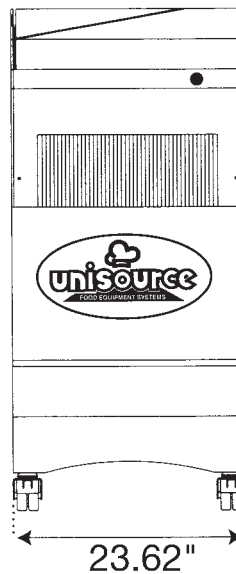

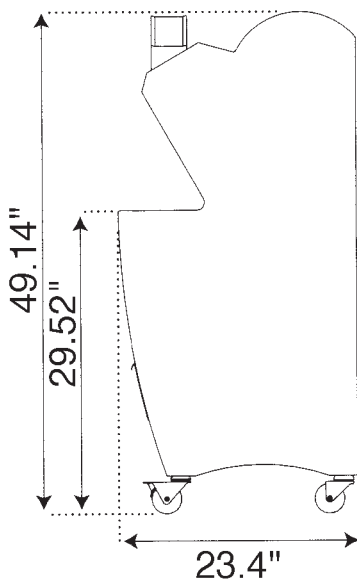

The "M" versions of the Face slicer, which are fitted with the lubrication system as standard, can also be supplied with a "lubrication" kit as an option, allowing them to meet the most demanding requirements.

The Face can slice any type of bread. The slices are maintained together following slicing, thanks to the Flaps.

The Face is a front loading slicer, a genuinely front-loading slicer! The operator positions and retrieves the bread from the same position, by simply tilting his forearms.

TECHNICAL SPECIFICATIONS
